## Community Update Saltville Waste Disposal Ponds Superfund Site July 1994

United States Environmental Protection Agency Region III

### Site Status

Since last Fall Olin Chemical, with EPA oversight, has been constructing a treatment facility to treat the pondwater from the Pond 5 area. The plant is scheduled to be fully operational by early Fall of this year.

Olin has submitted the Remedial Investigation, Risk Assessment, and Feasibility Study Reports for the Operable Unit 2 (OU2). OU2 consists of the Pond 5, Pond 6, and the Former Chlorine Plant Site areas. EPA is currently finalizing these reports. These reports fully characterize the physical and chemical characteristics of the site. The Feasibility Study develops possible remedial alternatives that could be used for clean up. Copies of these reports will be placed in the information repository later this summer for your review.

The next step in the process is the development of the Proposed Remedial Action Plan. This document will summarize the findings of the investigation reports for OU2 and highlight the alternative for clean up preferred by EPA. Later this year when EPA releases the Proposed Plan there will be a period of at least 30 days where citizens will have an opportunity to comment. EPA will also hold a public meeting during the Proposed Plan comment period to discuss the Plan and respond to comments. EPA expects to release the Plan later this summer.

**WE WANT TO MEET YOU!  
EPA-VDEQ STAFF  
AVAILABLE IN SALTVILLE**

**TO ANSWER YOUR  
QUESTIONS & CONCERNS**

**WEDNESDAY, JULY 27, 1994**

**6PM - 8PM**

**& THURSDAY, JULY 28**

**10AM - 4PM, 6PM - 8 PM**

**AT**

**SALTVILLE, VA**

**TOWN HALL**

**OR PHONE**

**EPA-VDEQ STAFF**

**AT (703) 496-5342**

**PRIOR TO 3PM JULY 28**

**WHILE WE ARE IN**

**SALTVILLE**

**AND WE WILL ATTEMPT  
TO MEET IN YOUR HOME  
OR BUSINESS TO DISCUSS  
YOUR QUESTIONS  
& CONCERNS**
